EDUCATION

Fulton Science Academy

August 2022 - Present

Currently studying at FSA. I am a 10th grader.

EXPERIENCE

AI/ML Researcher

Independent AI/ML researcher focused on inverse problems, computational cardiology, and uncertainty-aware neural operator models; additionally, doing work with world models and symbolic mathematics. Participating in Algoverse Program as well.

Research Intern at Linwei Wang's Lab @ RIT

Studying ventricular tachycardia at Linwei Wang's lab, under Sumeet Atul Vadhavkar, at Rochester Institute of Technology.

CubeSAT Power Team Co-Lead

Co-lead of school CubeSAT power subsystem team; developing power simulations for generation, storage, duty cycles, and subsystem load.

AP Calculus BC Teacher Assistant

I serve as a teacher's assistant for AP Calculus BC, and I help tutor as well as grade tests. I am also a Math Olympiad tutor for the middle schoolers.

Peachtree Math Circle Leading Officer

I am a leading officer at a newly founded non-profit for teaching and letting younger children experience competition math. Our website is <https://ptmath.com>, and is currently in development.

AWARDS

3x Fulton County Science and Engineering Fair Qualifier

Qualified for the FCSEF 3 times.

2x Georgia Science & Engineering Fair Best in Category

I won best in my category across the entire state of Georgia two times.

Top 300 Thermofisher JIC

I was selected as the top 300 junior innovators in the nation.

SKILLS

ML / Scientific AI:

PyTorch, Tensorflow, GNNs, World models, FNO, U-Net, RNNs, Monte Carlo dropout, uncertainty quantification, inverse problems

Simulation / Data:

openCARP, CellML, Bueno-Cherry-Fenton model

Embedded / Robotics:

Raspberry Pi, ESP32, Arduino, sensors, drones, ArduPilot, soldering, Fusion 360, Blender

Programming:

Python, C++, Java, Linux/WSL, scientific computing workflows
